- ✓ Linux Foundation LIFT Scholarship
- ✓ 2nd Place – Code Combat, Amity University Mumbai
- ✓ 3rd Place – Codenza, PHCET

EDUCATION

🎓 B.Tech in Computer Science
AMITY UNIVERSITY MUMBAI

WORK EXPERIENCE

Rivi

SOFTWARE ENGINEER – FULL STACK

Feb 2023 – Present

- **Team Decathlon Play:** – Led the development of Decathlon Play by revamping a legacy React project, which improved booking conversions by 15%.
- Implemented SEO best practices, leading to a **1M+ user increase YoY**, surpassing Decathlon.in's traffic growth.
- Led the frontend dev for Decathlon Partner Onboarding App, streamlining partner onboarding.
- Implemented dynamic form validation, API integrations, and role-based workflows, enhancing user experience and system efficiency.
- Implemented JWT/OAuth2 server-side authentication with Zero Trust principles, improving security and access control.
- **Team Rivi AI:** Architected & launched the Rivi AI SDK, a production-ready JavaScript and React SDK designed for AI-driven travel applications.
- Implemented real-time chat using WebSockets.
- Ensured tree-shakable, lightweight, and modular architecture, reducing bundle size by 40%, allowing travel businesses to integrate AI services efficiently with minimal configuration.
- **Tech Stack:** Next.js, React, WebSockets, Redis, SCSS, AWS.

TerminusDB

SOFTWARE ENGINEER – FRONTEND

Jul 2021 – Jul 2022

- Contributed to TerminusX, a SaaS platform built on TerminusDB, by implementing features such as commit switching, JSON schema validation, and enhancing UX by resolving key bugs and usability issues.
- Maintained the open-source TerminusDB JavaScript library (~100 weekly downloads), adding features like access control, JSON diff/patch support, and improving WOQL support.
- Refactored the JavaScript library and introduced automatic TypeScript-compatible type generation to improve developer experience and code reliability.
- Built and integrated CI workflows for automated documentation generation and publishing.
- Developed a proof-of-concept tool to generate TerminusDB document schemas directly from TypeScript class definitions using the TypeScript compiler.
- **Tech Stack:** Node.js, React.js, TerminusDB, TypeScript

Classplus

SOFTWARE ENGINEERING INTERN

Nov 2020 – Mar 2021

- Built and maintained backend for Classplus test portal used by tutors and students for managing exams.
- Contributed to the chat module as part of the Chat Engine team.
- Added features like optional questions and improved a system handling 100K+ monthly requests.
- Created end-to-end tests using TDD with 95% coverage.
- Managed backend responsibilities and blue-green deployments with a Senior Engineer.
- **Tech Stack:** Node.js, Express.js, Redis, Jest, MongoDB, AWS.
